

BE GREEN & MAKE GREEN

On Earth Day, join two revolutions at once. Be friendlier to the planet and smart with your money with . . .

7 TIPS TO BE GREEN & SAVE GREEN

Choose 1 tip per day and each week you'll save the planet and a few bucks.

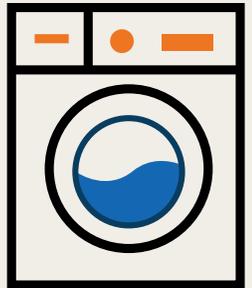

1 Ditch your car.
Carpool, walk, bike, or bus. You'll save gas money and maintenance costs on your vehicle.

2 Go meatless.
Livestock production accounts for one-fifth of all global greenhouse gases. Choose a less expensive protein like soy, nuts, lentils, or other beans.

3 Use easy-to-wash,
reusable linens instead of disposable paper towels and napkins. Then wash them in cold water and dry them on a clothesline.

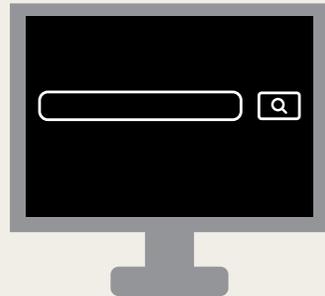

4 Take a cold shower.
You could save \$50-\$200/year by taking 1 cold shower each week. Cold showers are good for your hair, skin, and mood.

5 Unplug your appliances and don't use them all day.
75% of energy used by appliances is when they are not in use (but plugged in).

6 Use Blackle.com
instead of other search engines. Blackle has a black background which saves energy.

7 Do your cleaning with homemade products.
By using household items you can create environmentally safe cleaning products for pennies. Visit bit.ly/1P5DKNI for tips.

GOT THESE COVERED?
Here are 3 more tips to save a few bucks and the planet.

- Clean and replace your air conditioner filter. Save money. Be cooler. Breathe better.
- Create online accounts with your student loan servicer. Set up electronic correspondence. After you graduate, talk to your servicer about automatic payments. No stamps or envelopes needed and you may save with a lower interest rate.
- Slow down. Driving your vehicle at 55 mph instead of 65 mph can improve your mileage by about 15%.
